

Print the following page as many times as needed. The key imperative is that your name and CWID are provided in the prescribed location. Gradescope looks in a very specific place on the page for your information and then attempts to match that to enrolled students. If Gradescope can't find, or can't read, or match your name to CWID your work may not become associated with you. It is somewhat forgiving, but please take care when submitting work.

Do not submit this introductory page.

Only the first page will be scanned for your identifying information, so feel free to add additional pages as necessary.
